Invest in America!

Mid-America Credit Union Association is a marketing partner for the Invest in America program. Several credit unions across the Dakotas are stepping into the auto-finance gap to provide loans to credit union members to purchase new cars and trucks at discounted prices. The national campaign is called "**Invest in America**" and includes nearly eight thousand credit unions nationwide, making more than \$80 billion available in credit union low-cost auto loans for new vehicle purchases. Credit unions have always been embedded in their communities. "**Invest in America**" is an example of how the cooperative nature of credit unions benefits the local, state and national economies.

"The '**Invest in America**' campaign is win-win opportunity for credit unions and their members and especially for GM and Chrysler dealers in North Dakota," said Tony Richards, President/CEO of Mid-America Credit Union Association of North and South Dakota. "Credit unions across North and South Dakota have money available to lend at great rates for new vehicle purchases. With the '**Invest in America**' program, credit union members in North Dakota can take advantage of special deals that are exclusive to credit union members on new vehicle purchases and local GM and Chrysler dealers can move their new product," added Richards.

When you purchase a product or service from a U.S. - based company, that money is re-invested in America. From schools to roads to our police and fire departments, the money you spent on that purchase directly impacts the community services we all depend on. Invest in America is designed to offer you incentives to buy American products - and finance them (when necessary) with a low loan rate from your credit union.
